

1. Conducted requirement analysis and planned the architecture for the FetchKart multi-vendor e-commerce platform.
2. Designed and developed a modern, responsive, and user-friendly frontend interface using HTML, CSS, and JavaScript.
3. Implemented a complete role-based authentication system for Customers, Sellers, and Administrators.
4. Developed secure login and signup workflows using PHP session management.
5. Enhanced platform security by integrating password hashing and Cloudflare Turnstile CAPTCHA verification.
6. Designed and normalized the MySQL database schema with multiple relational tables for efficient data management.
7. Implemented complete CRUD operations for products, orders, users, reviews, coupons, and wishlist management.
8. Developed dynamic product browsing, searching, and category-based filtering functionalities.
9. Created a responsive shopping cart system with real-time quantity updates and total calculations.
10. Implemented a wishlist management system for improved customer experience.
11. Developed a professional multi-step checkout workflow with address validation and order summary generation.

12. Integrated Razorpay payment gateway for secure online payment processing.
13. Implemented multiple payment options including UPI, Digital Wallets, Net Banking, Cards, and Cash on Delivery.
14. Developed a coupon and discount validation system with minimum-order logic and promotional handling.
15. Implemented automated platform fee calculation and dynamic billing during checkout.
16. Created an advanced Seller Dashboard for inventory management, stock handling, and order monitoring.
17. Developed an Admin Dashboard for centralized platform management and analytics monitoring.
18. Implemented product stock management and seller logistics preference configuration.
19. Developed a complete order management and order tracking system with delivery status visualization.
20. Implemented intercity logistics tracking simulation and local delivery progress system.
21. Added customer review and product rating functionality to improve user engagement.
22. Implemented dark mode and light mode theme support for enhanced accessibility and user experience.
23. Optimized UI/UX using modern layouts, gradients, animations, and responsive design techniques.

24. Improved frontend responsiveness and fixed scaling/layout issues across multiple devices and screen sizes.

25. Implemented session-based cart persistence and secure order handling mechanisms.

26. Performed extensive debugging, testing, and validation for frontend, backend, and database modules.

27. Conducted cross-browser compatibility testing and responsive behavior optimization.

28. Maintained structured version control and tracked iterative development using GitHub commits.

29. Prepared professional project documentation including README, screenshots, installation guide, and feature overview.

30. Successfully deployed and tested the application in a WAMP/XAMPP local development environment.

31. Gained practical experience in full-stack web development, payment gateway integration, database management, authentication systems, and responsive UI/UX engineering.

32. Enhanced problem-solving, debugging, software architecture planning, and real-world application development skills during the internship period.
